**WARNING**

YOU MUST ALWAYS REMOVE THE PLATTER AND BEARING AND USE THE TRANSIT PACKAGING WHEN YOU TRANSPORT YOUR TURNTABLE OR YOU MAY DAMAGE THE BEARING

DON’T PUT IT ON THE BACK SEAT OF YOUR CAR—YOU’LL BREAK IT
**PREFACE**

Please take time to read this Instruction Manual before unpacking your Diva II SP Turntable. This product is a precision-engineered machine and whilst damage is unlikely with careful handling, the sheer mass of some of the parts could lead to damage of less robust parts within its design. Some of these parts have been excluded from the warranty.

<TAKE CARE AND READ THIS MANUAL>

**INTRODUCTION**

Diva II SP is an audio analogue turntable manufactured to extreme limits of precision and design. There are many unique and novel features in this product and its design allows you to install the pick-up arm and cartridge of your choice. With correct ancillary equipment will take your listening pleasure to new levels of excellence.

Whilst it shares some features found in other turntables, it has been designed without compromise not trying to emulate or improve existing designs but redefine the whole thinking behind turntable design.

We hope that you enjoy this turntable for many years!

**WARNINGS**

1. To prevent fire or electric shocks do not expose either the power supply or motor assembly to rain or moisture.
2. The Main Bearing contains a Sapphire Cup Jewel and this can be damaged if proper care is not taken (see set-up and warranty) and this will affect or stop your turntable working correctly.
3. The Power Supply contains voltages, which can cause serious injury or death as there are no user serviceable parts and there is no reason to open it. In situations of failure return to an approved dealer or service agent. There are calibrated components inside and altering their settings will affect the performance and void the warranty.
4. The Motor is a sealed component and must under no circumstances be opened or adjusted.

**PACKAGING**

Save all the packing in a dry place away from fire hazard. The Diva II SP Turntable is a precision instrument and the packaging has been especially designed so that all component parts are safe during transportation.

You should not have occasion to return your unit to us, but if you need to, the unit must be shipped in its original packaging to keep it from damage. In the event of the packing being lost or damaged further packing can be provided at cost.

Do not transport the turntable assembled. This may cause damage and void the warranty.

**PARTS CHECKLIST**

The packing has been designed to eliminate parts being missed, however if something is found to be amiss please contact your dealer.

SET UP INSTRUCTIONS

THE SUPPLIED PACKAGING IS VITAL FOR PROTECTION AND SHIPPING. IT SHOULD BE RETAINED AND REPLACEMENT PACKAGING IS COSTLY.

PACKAGING.

- On opening the box you will see the power supply, clamp and bearing. It may or may not have an arm fitted.
- Refer back to this manual should you need to repack.
- Lift out top layer using the hand holes.

- The motor and power supply should be removed from the packaging first, complete with its foam packaging. Do not pull the motor out by its supply lead.
- Lift the turntable base out with the packaging using the hand holes.

- The platter is located in the base layer.

- Remove the packaging from the main base chassis.
- You must clean the top of the bearing spindle now and ensure it’s always kept clean - insert soft tissue into top of spindle and twist to clean.
- Place the bearing ball into top of spindle.
  DO NOT USE ADHESIVE OR ADD LUBRICATION TO THIS AREA.

- Fit the bearing onto the spindle.
- Careful – do not drop onto spindle as you may damage the sapphire. There is a pressure release hole in the top of the bearing so it may fit down quicker than you expect.
- Spin the bearing to make sure it’s running ok.
• PLACE THE TURNTABLE WHERE IT IS TO BE PLAYED - THIS SHOULD BE A FLAT LEVEL RIGID SURFACE.
• PLACE THE MOTOR CLOSE TO THE SUBCHASSIS AS IN PICTURE.
• MAKE SURE THE MOTOR DOES NOT TOUCH THE CHASSIS.
• IDEAL POSITION IS 118mm FROM SPINDLES CENTRE TO CENTRE.
• ALWAYS USE CLEAN HANDS TO AVOID CONTAMINATING THE BELT.

• PLACING THE PLATTER UPSIDE DOWN, FIT THE BELT FITTING PIN INTO THE HOLE ON THE EDGE RIM OF THE PLATTER.
• FIT THE FIRST BELT TO THE INNER HUB AND THEN ONTO THE FITTING PIN, FOLLOWED BY THE SECOND BELT.
• TAKE CARE NOT TO GET ANY DIRT OR GREASE ONTO THE BELT.

• PLACE THE PLATTER ONTO THE BEARING - DO NOT DROP INTO PLACE AS THIS MAY CAUSE DAMAGE TO THE SAPPHIRE.
• TRY TO POSITION THE DRIVE PULLEY SO THE BELTS ARE EITHER SIDE.
• ROTATE THE PLATTER MAKING SURE THE BELTS FIT ONTO THE DRIVE PULLEY CORRECTLY AND THEN REMOVE FITTING PIN.
• THE DRIVE BELTS SHOULD BE POSITIONED AS IN THE IMAGE BELOW.

• CONNECT THE DIN LEAD TO THE REAR OF THE POWER SUPPLY.
• CONNECT THE MAINS LEAD TO THE POWER SUPPLY.
• FIT THE CLAMP BY SCREWING ONTO THE SPINDLE. MAKE SURE NOT TO CROSS THREAD.

AFTER INITIAL ASSEMBLY IT IS RECOMMENDED YOU RUN THE TURNTABLE FOR ABOUT 3 HOURS TO CORRECTLY LUBRICATE THE MAIN BEARING.

POWER SUPPLY

Front Panel: Power knob: rotate clockwise to switch on. Buttons PLAY/SPEED and indicator LED’s.
Rear Panel: IEC Mains socket; DIN output socket connection for motor lead.
The mains cable provided or a suitable alternative should be fused at no more than 5 AMPS.

To start the turntable, press ‘PLAY’. Default speed is 33 RPM and the play light will shine red.
To change speed the turntable power supply must be in the stop setting (not playing), however the platter does not have to be stationary, so changing from 33 to 45 for instance, press the play button, then the speed change button and then press play again and the platter will speed up to 45.
You may also start the turntable from stationary to speed up to 45 RPM.

To adjust the speed you’ll require a strobe disc or other method. One is not provided as there are many commercially available and customers will have their preference of type and brand.

With the unit in PLAY mode and the desired speed selected, press both PLAY and SPEED buttons together and hold until the speed light flashes.
Then press the left button to decrease speed and the right button to increase speed.
Then press both buttons together again to lock the speed.
Do the same for either speed and the setting is retained even after switching off the unit.

DO NOT SEE HOW FAST OR HOW SLOW THE UNIT WILL OPERATE AS THIS COULD CAUSE THE UNIT THE MALFUNCTION AND WILL NOT BE COVERED BY OUR WARRANTY.

Fuse in turntable PSU
PSU
220~250v T1.0A slow blow
100~120v T2.0A slow blow
SERVICING

Because of the careful design of this product general servicing is not required. The only two things that will need attention will be:
1. Drive Belts, which we suggest be replaced annually.
2. Main Bearing Lubrication. This should be done by AVID after approximately 10 years service.

CLEANING

To maintain the visual appearance, occasionally dust the surfaces with a normal duster - no need for any sprays or polishes.

**DO NOT ATTEMPT TO CLEAN THE DRIVE BELT WITH ANYTHING.**
**IF DIRTY OR GREASY IT WILL PROBABLY NEED REPLACING.**

Never use cleaners containing abrasives, as this will damage the surface.

Warranty Statement

UK Residents

AVID HIFI Limited products are warranted against defects in materials and workmanship for a period of two years from the original date of purchase, or no later than three years from the date of shipment to an authorized AVID agent, which ever comes first, extending to five years subject to the product owner having submitted the Registration form (www.avidhifi.com/register.htm).

Also the following conditions being observed:

- The product must have been purchased through an authorized AVID dealer
- This warranty is in favour of the original purchaser only, except where...
- Warranties are transferable to subsequent owners provided the new owner completes the product registration form. Warranty obligation is passed from dealer to manufacturer.
- During the warranty period, AVID will repair, or replace any defects in material or workmanship, without charge for parts or labour.
- Should product need to be returned a written description of the defect and a photocopy of the original purchase receipt must accompany it. Receipts must show the model, serial number, date of purchase, name and address of purchaser and authorized dealer and the price paid.
- Returned product must be packed in the original packing and returned to AVID or original dealer by the customer at his/her expense. AVID will pay return freight of its choice.
- The warranty is void if the product has been used or handled other than in accordance with the instruction manual supplied, abused or misused, damage by accident or neglect or in being transported, or the defect is due to the product being repaired or tampered with by anyone other than AVID or an dealer with prior authorization.
- The warranty is void if the product serial number has been removed, altered or made illegible.
- The warranty is void if the product has been taken out of the country of purchase.
- Specific parts excluded from this warranty include: sapphire thrust bearing, drive belts and O-rings, and power supplies which have been misused. These items have no warranty, however replacements may be issued by AVID at our discretion.
- AVID shall not be held liable for incidental or consequential damages of any kind arising from the sale or use of its products.
- The warranty applies to ex-demonstration product, using the date of manufacture as purchase date.
- Where the product is sold under a consumer transaction (as defined by the Sale of Goods Act 1979) the statutory rights of the purchaser are not affected by this warranty.
- Products are sold on the basis of specifications applicable at the time of sale. AVID shall have no obligation to modify or to update products once sold.
Outside UK

- AVID has formal distribution in many countries throughout the world. In each country the AVID importer has contractually accepted the responsibility for the product warranty. Warranty should normally be obtained from the importing agent or distributor from whom you obtained your product. In the unlikely event of service required beyond the capability of the importer, AVID will, of course, back up the warranty.
- Where product has been either supplied directly or there is no current distributor, AVID accepts responsibility for the warranty period.
- Returned product must be packed in the original packing and returned to AVID by the customer at his/her expense. AVID will pay return freight of its choice.
- The warranty is only valid in the country of purchase.
- Products outside there original destination requires that units with remaining warranty be returned to the country of purchase for the warranty to be valid. Customer is responsible for freight both ways and all associated import and export charges.
- Foreign distributors are not required to provide warranty service, repair or change AC mains voltage on units that they did not originally import and sell.
- Foreign distributors may at their discretion offer service for a fee.

MISCELLANEOUS. ANY IMPLIED WARRANTIES RELATING TO THE ABOVE PRODUCT SHALL BE LIMITED TO THE DURATION OF THIS WARRANTY. THE WARRENTY DOES NOT EXTEND TO ANY INCIDENTAL OR CONSEQUENTIAL COSTS OR DAMAGES TO THE PURCHASER.

WARRANTOR. Inquiries regarding the Limited Warranty may be sent to the following address:
AVID HIFI Limited. Bicton Industrial Park, Kimbolton, Huntingdon. PE28 0LW ENGLAND
